Flujo de práctica

Primero inicié el repositorio, después de iniciarlo creé el archivo readme.md para poder iniciar git flow. Antes de git flow subí a la rama main archivo, posteriormente inicie git flow y creé la rama de feature para desarrollar la funcionalidad, una vez terminada se finaliza la rama lo que elimina la rama y la fusiona con develop. Una vez en la rama develop se inicia el release para lanzar la versión. Se modifico el README.md y se añadió y se hizo el commit para posteriormente finalizar el release añadiendo los tags. Finalmente se suben los archivos en la rama develop y main con git push.
